

Airline Revenue Analysis Dashboard

Power BI Dashboard Project

Akasam Rajesh

Aspiring Data Analyst

Power BI

Excel

Power Query | DAX

Project Overview

Built an interactive Power BI dashboard to analyze airline revenue, bookings, and passenger trends across multiple airlines and airports.

Project Highlights :

- Revenue, profit & profit margin trends
- Booking status — confirmed vs cancelled
- Passenger trends by gender, day & ticket class
- Revenue by airline, airport & payment mode
- MTD, QTD & YTD revenue tracking

Tools : Excel | Power Query | Data Modeling | DAX

Data Model — Star & Snowflake Schema

This project uses a Star and Snowflake Schema to connect related tables, keeping the data organized, reducing duplication, and supporting accurate reporting in Power BI.

Revenue & Profit Overview

Booking Analysis

Total Bookings : 144K | Confirmed : 119.53K | Cancelled : 24K

Booking Rate : 83.02% | Cancel Rate : 16.98%

Top Airline by Bookings : Indigo — 82.79K Booked | 16.98K Cancelled

Bookings by Ticket Class : Economy 55K | Premium Economy 40K | Business 25K

Top Payment Mode : UPI — 78K

Gender Split : Male 97.9K | Female 46.1K

Passenger Trends

Revenue Tracking

Revenue This Year (2021) : 704.45M

Revenue Same Period Last Year : 653.92M

Year-over-Year Growth : 7.73%

Revenue by Route (Source → Destination)

Visakhapatnam → Rajiv Gandhi : Revenue 11.11Cr | Profit 2.03Cr
Vijayawada → Rajiv Gandhi : Revenue 8.47Cr | Profit 2.06Cr
Tirupati → Rajiv Gandhi : Revenue 5.80Cr | Profit 1.15Cr
Rajahmundry → Rajiv Gandhi : Revenue 8.43Cr | Profit 1.77Cr
Kurnool → Visakhapatnam : Revenue 1.34Cr | Profit 22.01L
Kadapa → Vijayawada : Revenue 1.06Cr | Profit 24.38L

What I Learned

As a fresher, this project gave me practical experience in data modeling, data transformation, DAX, and building interactive dashboards using Power BI.

Tools I got hands-on with :

Power BI

Excel

Power Query

DAX

Actively looking for Data Analyst opportunities. Open to feedback and connections!
